

Progr. Project #4 - Week 5 - Assignment 01

- Choose a free RESTful API (see some suggestions in the box below) and create a front end HTML/CSS/JS web page that fetches the API information and display in your web page.
- The aesthetics is not part of the evaluation, but the mastering of HTML/CSS/JS is. So, do not let ugly formatting for lack of effort to fix it.
- The end goal here is for you to master the creation of a REST client using HTML/CSS/JS.
- It is probably a good idea to program a command line API client App to test your API handler.

A list of free APIs is available at <https://apilist.fun>. This list include also not RESTful APIs, choose wisely.

Progr. Project #4 - Week 5 - Assignment 01

- Use as base of your solution the example shown in slides 20 to 24.
 - You should create a folder with all the necessary files:
 - .html
 - .css
 - .js
 - images
 - Name your main HTML file with the name index.html;
 - Try your example thoroughly before submitting it!

Your task:

- Zip your folder (and possibly subfolders) with all necessary files and submit it in the appropriate Canvas until Next Wednesday.
