RAM Disk

5s

```
from google.colab import drive
drive.mount('/content/drive')

%run /content/drive/MyDrive/filepathconversion.py
```

Drive already mounted at /content/drive; to attempt to forcibly remount, call drive.mount("/content/drive", force_remount=True).
Name of the current operating system: posix

Name of the current OS system: Linux

Enter the file name with path: \Program Files\Custom Utilities\StringFinder.exe

The file path has been converted according to the system: /Program Files/Custom Utilities/StringFinder.exe
